Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This communication is in response to applicant's 04/29/2005 amendment(s)/response(s) in the application of **DUCKERING et al.** for "**FAIR SHARE SCHEDULING OF MULTIPLE SERVICE CLASSES WITH PRIORITIZED SHAPING**" filed 02/12/2004. The amendments/response to the claims have been entered. No claims have been canceled. No claims have been added. Claims 14-19 are now pending.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 14-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bonomi et al. (US 5,831,971), hereinafter, in view of Kim (US 5,999,534)

Regarding claims 14 and 17, Bonomi discloses a method for limiting a rate which a connection is serviced at a queuing point for a plurality of connections including the connection, the method comprising:

arranging the plurality of connections into a plurality of queues (receiving incoming cell from connection step 310 in figure 3; and the cell is added to particular queue, see step 350 in figure 3);

determining whether the connection exceeds a rate limit defined for the connection (determining whether the incoming traffic is compliant (conforming) or non-compliant (nonconforming)).

Bonomi further discloses that the non-compliant or nonconforming traffic are reschedule with WFQ scheduler (see claim 9); and the compliant or conforming traffic are schedule with the fair leaky buffer shaper (see col. 7 lines 52-59).

Bonomi fails to discloses scheduling the connection that exceeds its rate limit with a peak rate limiting shaper; and scheduling the connection within its rate limit with a WFQ scheduler.

However, it would have been obvious to one having ordinary skill in the art at the time of invention was made reverse the teaching of Bonomi especially serving the non-compliant or non-conforming traffic with traffic shaper and serving the compliant or conforming traffic with the WFQ scheduler in order to force the non-compliant traffic to comply with the connection's contract by using leaky buffer shaper; and providing the compliant traffic with its share of bandwidth.

Bonomi fails to explicitly discloses arranging the connection into prioritized queues.

Kim, on the other hand, discloses arranging the connection into prioritized queues (see figure 1).

Therefore, it would have been obvious to one having ordinary skill in the art at the time of invention was made arrange the incoming connection into prioritized queues as taught by Kim for simplifies admission control and allocation of bandwidth.

Regarding claims 15 and 18, Bonomi discloses the plurality of connections have traffic descriptors associated therewith (QOS, see background of invention).

Regarding claims 16 and 19, Bonomi disclose the traffic descriptors includes the rate limit (QOS includes rate, see background of invention).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
